Heat
Pumps

The most quiet and efficient heat pump you can buy.¹

Efficiency that saves

Quiet isn't the only thing that makes the XP21 stand out. With industry-leading efficiency ratings of up to 19.20 SEER and 9.70 HSPF, the XP21 can save you hundreds of dollars each year on utility bills, compared to older or conventional units.

A comforting quiet

Engineered with exclusive SilentComfort™ technology, the XP21 operates at levels quieter than any other heat pump on the market. A composite fan design, two-stage operation and insulated compressor compartment also help reduce sound levels.

Highlights

Improved performance and efficiency.

Two-stage operation provides ideal comfort and operation

Improved comfort and indoor air quality.

Optimized for use with the Humiditrol® whole-home dehumidification system³ to manage the moisture in your home's air

Environmentally responsible. Uses chlorine-free R-410A refrigerant

Added savings. ENERGY STAR® qualified

Peace of mind. 10-year limited warranty⁵ on the compressor and all remaining covered components

The XP21 has earned the ENERGY STAR® Most Efficient 2013 label, which means it is recognized as one of the most efficient products that qualify for ENERGY STAR.

efficiency ratings Up to 19.20 SEER and 9.70 HSPF⁴

This chart compares the 5-year savings you can expect from a 18.20 SEER/9.70 HSPF heat pump vs. existing equipment with a 10.00 SEER/6.80 HSPF rating and industry-standard with a 13.00 SEER/7.70 HSPF rating. The regions used to calculate household fuel and utility costs reflect a cross-section of cities in the U.S. In addition to geography, cooling costs are based on 3-ton capacity specifications, with 800 cooling hours, 2,250 heating hours per year and 11.62 cents per kWh (Source: EIA National average electric rate—Rolling 12 months ending in July 2009). Your actual costs will vary depending on the weather, local fuel rates, systems settings and your personal lifestyle.

The simplest way to bring money-saving **SOLAR POWER** into your home

The SunSource® Home Energy System reduces the amount of electricity needed from your utility provider to put you in control of your utility bills. This energy-saving system harnesses solar energy and uses it first—before using electricity from the utility company—to power your heat pump. The solar power that's collected can also operate other appliances and electronics when the heating and cooling system is not in use. What's more, if the SunSource system generates more solar power than is needed, that power will be sent back to the utility company, possibly entitling homeowners like you to a utility bill credit. Ask your Lennox Dealer for more information.

The most efficient single-stage heat pump you can buy.²

The XP17 has earned the ENERGY STAR® Most Efficient 2013 label, which means it is recognized as one of the most efficient products that qualify for ENERGY STAR.

Engineered for efficiency

With a state-of-the-art single-stage motor innovation that improves efficiency, the XP17 boasts efficiency ratings of up to 17.70 SEER and 9.50 HSPF. This can save you hundreds of dollars each year on utility bills, compared to older or conventional units.

Exceptionally quiet

The XP17 is the quietest heat pump you can buy.² Featuring an exclusive SilentComfort™ outdoor fan motor with composite blades design and a precision-molded compressor sound cover, the XP17 reduces operational sounds to industry-low levels of 63 dB.

Highlights

Environmentally responsible. Uses chlorine-free R-410A refrigerant

Added savings. ENERGY STAR® qualified

Peace of mind. 10-year limited warranty⁵ on the compressor and all remaining covered components

efficiency ratings Up to 17.70 SEER and 9.50 HSPF⁴

This chart compares the 5-year savings you can expect from a 16.20 SEER/9.50 HSPF heat pump vs. existing equipment with a 10.00 SEER/6.80 HSPF rating and industry-standard equipment with a 13.00 SEER/7.70 HSPF rating. The regions used to calculate household fuel and utility costs reflect a cross-section of cities in the U.S. In addition to geography, cooling costs are based on 3-ton capacity specifications, with 800 cooling hours, 2,250 heating hours per year and 11.62 cents per kWh (Source: EIA National average electric rate—Rolling 12 months ending in July 2009). Your actual costs will vary depending on the weather, local fuel rates, systems settings and your personal lifestyle.

icomfort Wi-Fi®-enabled

When you pair the XP21 or XP17 with the icomfort Wi-Fi, the most advanced and innovative Lennox® thermostat, you'll enjoy a new definition of comfort and convenience. From remote temperature adjustment to a customizable appearance to a five-day weather forecast and more, the icomfort Wi-Fi helps you get more out of your Lennox system.

High-efficiency, two-stage comfort

Efficient performance

Featuring an advanced, two-stage design, the XP16 boosts efficiency ratings of up to 16.50 SEER and 9.50 HSPF. The XP16 uses only the energy necessary to heat and cool your home, lowering your utility bills.

Peaceful and quiet

With a precision-balanced direct-drive fan, the XP16 delivers ultra-quiet operation, leaving your home peaceful and relaxing. This innovation leads to operating sounds as low as 74 dB, meaning that the XP16 is much quieter than a standard heat pump.

Highlights

Improved comfort and indoor air quality.

Optimized for use with the Humiditrol® whole-home dehumidification system³ to manage the moisture in your home's air

Environmentally responsible. Uses chlorine-free R-410A refrigerant

Added savings. ENERGY STAR® qualified

Peace of mind. 10-year limited warranty on the compressor and 10-year limited warranty on all remaining covered components⁶

efficiency ratings Up to 16.50 SEER and 9.50 HSPF⁴

Savings chart compares the 5-year savings you can expect from a 16.00 SEER and 9.20 HSPF heat pump vs. existing equipment with a 10.00 SEER/6.80 HSPF and industry-standard equipment with a 13.00 SEER/7.70 HSPF rating. The regions used to calculate household fuel and utility costs reflect a cross-section of cities in the U.S. In addition to geography, cooling costs indicated are based on 3-ton capacity specifications, with 800 cooling hours, 2,250 heating hours per year and 11.62 cents per kWh (Source: EIA National average electric rate—Rolling 12 months ending in July 2009). Your actual costs may vary depending on the weather, local fuel rates, system settings and your personal lifestyle.

¹ A combination of sound ratings established per AHRI's test standard: AHRI 270-2008; and efficiency ratings established per AHRI's test standard: ANSI/AHRI 210/240-2008.

² Air conditioners/heat pumps have sound ratings established per AHRI's test standard: AHRI 270. Size for size, as a product family, these air conditioners/heat pumps have the lowest published sound ratings of any major U.S. brand of air conditioning/heat pump equipment. Efficiency claim based on comparison of single-stage heat pump products' SEER and HSPF as published in AHRI (December 2009). The XP16 has a maximum rated efficiency of 17.70 SEER and 9.50 HSPF.

³ Must be accompanied by either a variable speed air handler or furnace and the ComfortSense® 7000 Series touchscreen thermostat.

⁴ Actual system efficiency may vary depending on the exact system match. Efficiencies are representative of a single AHRI Most Popular matched combination. Always verify actual system efficiencies through AHRI or by visiting AHRI ratings database at www.ahridirectory.org.

⁵ Warranties noted apply to residential applications only. See actual warranty certificate for details.

⁶ Online equipment registration at www.lennoxregistration.com is required within 60 days of installation (except in California and Quebec) or Lennox' base warranty will apply. Applies to residential applications only. See actual warranty certificate for details.

Note: Always verify actual system efficiencies through AHRI or by visiting the AHRI ratings database at www.ahridirectory.org.

Elite® Series XP14 Heat Pump

A dependable, high-efficiency heat pump

Efficiency that saves

With an outdoor coil that provides exceptional heat transfer and low air resistance for high-efficiency operation, the XP14 features efficiency ratings up to 16.50 SEER and 9.50 HSPF. This, in turn, leads to lower utility bills, saving you money all year long.

Comfort all year long

From exceptional cooling in the summer to cozy warmth in the winter, the XP14 is designed to keep you comfortable year 'round. A dependable scroll compressor means your system will work smoothly, efficiently and reliably—whenever you need it.

Highlights

Improved comfort and indoor air quality.

Optimized for use with the Humiditrol® whole-home dehumidification system³ to manage the moisture in your home's air

Environmentally responsible. Uses chlorine-free R-410A refrigerant

Added savings. ENERGY STAR® qualified

Peace of mind. 10-year limited warranty on the compressor and 10-year limited warranty on all remaining covered components⁶

Elite® Series XP13 Heat Pump

Efficient, economical heating and cooling

Getting more for less

Engineered with a dependable scroll compressor, the XP13 delivers efficient comfort all year long. With efficiency ratings of up to 14.50 SEER and 8.70 HSPF, the XP13 can help you save on utility bills—season after season, year after year.

Built to last

The XP13 has a number of features that assure dependable performance for years to come. Constructed with a durable steel cabinet and a SmartHinge™ louvered design, the XP13 is simple to clean and maintain.

Highlights

What are SEER and HSPF?

SEER stands for "Seasonal Energy Efficiency Ratio" and is a measure of the cooling efficiency of heat pumps. The higher the SEER, the greater your energy savings. The federal minimum established for any new equipment is 13.00. HSPF stands for "Heating Seasonal Performance Factor" and is a measure of the heating efficiency of heat pumps.

As a four-time winner of the ENERGY STAR[®] Manufacturing Partner of the Year award—and the first and only winner in the heating and cooling industry—Lennox is committed to making and selling energy-efficient solutions that help protect the environment and save you money on your utility bills.

Lennox has earned the Good Housekeeping Seal on select furnaces, air conditioners and heat pumps. Ask your dealer for details.

A system beyond compare.

These cooling systems deliver even greater efficiency and comfort when combined with other Lennox® products in one system.

CBX40UHV

The quietest and most efficient air handler you can buy*

PureAir™ Air Purification System

Cleans the air inside your home better than any other single system you can buy

Healthy Climate Solutions™

Industry-leading dehumidification, plus whole-home ventilation and more

icomfort Wi-Fi® Thermostat**

Offers advanced, innovative features like remote access, emailed system alerts, a five-day weather forecast, precise temperature control and much more

Matching your system

Replacing only one part of a system may result in a mismatch that compromises energy efficiency. For best performance, it's generally a good idea to replace the entire system at once.

Optimizing your system

The heat pump you select is at its innovative best when it's integrated with the following:

SunSource® Home Energy System—Allows you to maximize the energy-savings potential of the XP21's or XP17's solar-ready design by integrating it with one to 15 solar modules.

Harmony III™ Zoning System—Divides your home into up to four separate, customizable comfort zones.

*Based on sound pressure levels during operation of CBX40UHV-36 with factory-installed MERV 16 Precision Pleat™ media filter and leading competitive three-ton units at equivalent external static pressure when set up per Section 4.5.3 of AHRI's test standard, AHRI 260-2001; and efficiency (CFM/watt) ratings established per AHRI's test standard: ANSI/AHRI 210/240-2008.

**Must be installed with an icomfort™-enabled indoor unit.
